## Where are you from (wayf)

Select the application domain you want to access

Customs

Select the country where you want to be authenticated

Monaco

Select type of actor

Economic operator

I am acting on behalf of:

☐ Myself

☐ The following (natural/legal) person with:

☒ I give my consent to request my Identity Profile information and share it with UUM&DS and Customs EIS

Submit

# 1. Manage Trader Preferences

The Manage Preferences page is the area where the user can manage communication preferences as well as configure their own AS4 Access Point(s) in STI-STP.

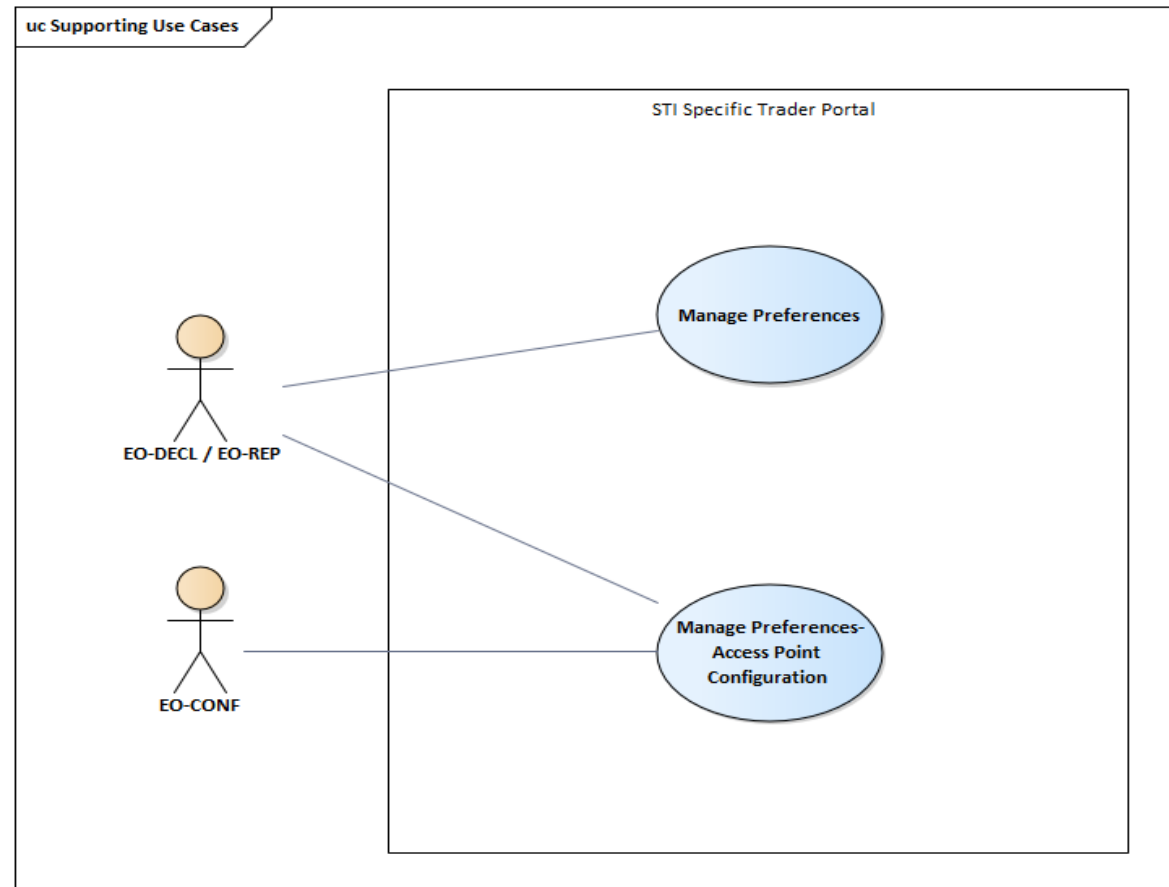

More specifically, with the **EO-CONF (EO-Configurator)** or **EO-DECL (EO-Declarant)** or **EO-REP (EO-Representative)** roles a user can configure which kind of optional notifications she/he wishes to receive or not. Those optional notifications are informative notifications and are delivered to the system of the Actor depending on communication preferences in STI-STP.

Furthermore, with the **EO-CONF (EO-Configurator)** role a user can configure one or more parties (with a partyId and endpoint (URL)) and for each party, the ICS2 STI service version they support and the message exchange pattern (push or pull). The Actor can use the configured parties to set the default communication path per business domain.

**STI-STP:** <https://conformance.customs.ec.europa.eu/euctp>

# 1. Manage Trader Preferences

# 1. Manage Trader Preferences

**Manage Preferences page is accessible from the Navigation Menu.** The system presents a list of options for the Actor to define the type of ICS2 user she/he is:

- *EO declarant/representative acting also as a sender* (EO who has developed its own system to exchange ICS2 messages has to use option 1)
- *EO declarant/representative not acting as a sender* (EO that is using ITSP services has to use option 2)
- *Just acting as a sender* (ITSPs has to use option 3)

**Options are exclusive and it's mandatory to choose one**

# 1. Manage Trader Preferences

The relation between the option chosen in the welcome page and what is displayed in Manage Preferences is depicted below:

- **EO declarant/representative acting also as sender:**
  - Optional notifications
  - AP configuration
  - Default communication paths
- **EO declarant/representative not acting as sender:**
  - Optional Notifications
  - AP configuration
  - Default Communication paths
- **User acting as a sender:**
  - AP configuration

# 1. Manage Trader Preferences

EU Trader Portal

http://ec-euctp.pnv:7777/

European Commission | TAXATION AND CUSTOMS UNION

You are logged-in as Trader Fullname (0420257) English EN

EU Trader Portal > STI-STP > Manage Preferences

Manage Preferences

Please select the option that best suits your needs:

- ☐ I am an EO declarant/representative acting also as a sender.
- ☐ I am an EO declarant/representative not acting as a sender.
- ☐ I am acting as a sender.

Examples of roles as an actor on the ICS2 messages are Person Filing, Carrier, Person not yet filed or Notify Party.

User will see only the relevant Preferences for him. User needs to select 1 option. Options are exclusive. The options by default are empty.

Continue

Only enabled when there is an option selected

# 1. Manage Trader Preferences

The system, depending on the selection in the previous step, may present:

- Switch On/Off optional ICS2 notifications either as a Person Filing or as a Carrier
- Switch On/Off ICS2 notifications via STI-STP, including for ENS Filings that were not submitted through STI-STP or notifications to EOs, other than the person filing, with a default path different from STI-STP. Duplicate notifications will be shown on the EUCTP Dashboard. (*Note: The original submission channel will also receive a notification*)
- Configure Access Points with the Party ID and information related to communication
- Configure the Communication Paths, including a default communication path for each Business Domain

# 1. Manage Trader Preferences

The system allows the user to switch ON/OFF each of the notifications

## ✓ Notification switch

Switch  on/off to enable or disable the notification.

*IE3R01 ENS Registration Response is mandatory for the person filing the ENS and it is not editable.*

**The EO-DECL and EO-REP have read-only rights. No “Delete” actions and no “Add party” or “Add communication path” buttons are enabled. The user is able to perform the main use case flow only.**

# 1. Manage Trader Preferences

## ✓ Add/Delete Communication Path

Clicking on  button will display the pop-up window Add Communication Path.

*The “Add Communication Path” will be described in next section*

Clicking on  next to the Communication Path will delete the row.

## ✓ Add/Delete Party Id

Action

Add Party ID

Clicking on the  button will display the pop-up window Add Party Id.

*The “Add Party Id” use case will be described in next section*

Clicking on  next to the Party Id will delete the row.

add Party ID

For further reference:  
Party id format is defined in ICD.  
"Supported STI service version" is agreementRef, defined in ICD.  
Fields are mandatory for the setup of a single party from an EORI (Trader), except the Endpoint (mandatory only when push) and the Technical contact fields (optional).  
A single EORI (Trader) can setup multiple

Deletes not available for the Party ids in use as default communication path

# 1. Manage Trader Preferences

## Access Point Configuration - Add Party ID

The Access Point Configuration pop-up is accessible from the Manage Preferences page, only for users with configuration rights.

This pop-up allows the user to configure an Access Point Configuration with the Party Id and information related to communication.

- System presents the AP configuration form with these fields:
  - PartyId such as <system>@<EORI>@<MS> (where system and MS are optional)
  - Message Exchange Pattern (MEP): either push or pull
  - Endpoint (URL)
  - TLS Client Certificate
  - Supported STI Service Version
  - Contact Details (Name, E-mail address/Phone number)

# 1. Manage Trader Preferences

## Access Point Configuration - Add Party ID

- ✓ The Actor fills the appropriate Access Point Configuration form and uses the button “Save and Notify”
- ✓ The Actor saves Trader Preferences
- System triggers the email notifications of the Access Point Configurations selected to be notified. A confirmation notification “Your changes have been communicated to ITSM” will be provided, notifying the email has been sent (or an appropriate error otherwise)
- ✓ The Actor fills the appropriate Access Point Configuration and uses button Save
- System will provide a verification message, informing the user of two options:
  - Confirm the option, system will save the Access Point Configuration, without sending a notification to ITSM
  - Decline the option, user returns to filled Access Point Configuration form in order to Save and Notify

# 1. Manage Trader Preferences

# 1. Manage Trader Preferences

## Access Point Configuration - Add Communication Path

The Default Communication Path pop-up is accessible from the Manage Preferences page, only for users with configuration rights.

This pop-up allows the user to define a default communication path per Business Domain.

- System presents the Default communication paths, including:
  - Business domain (current values: postal, air general, maritime, express, road, rail)
  - Communication Path (S2S or U2S)
  - PartyId (only available for S2S path)

# 1. Manage Trader Preferences

## Access Point Configuration - Add Communication Path

### ✓ Business Domain

Select the Business Domain from the dropdown list:

A screenshot of a web application's dropdown menu for selecting a Business Domain. The menu is open, showing a list of options: POSTAL, MARITIME, AIR, RAIL, ROAD, and EXPRESS. The 'EXPRESS' option is currently selected and highlighted with a blue background. The dropdown has a small upward and downward arrow icon in the top right corner.

### ✓ Communication Path

Select the Communication Path from the dropdown list:

A screenshot of a web application's dropdown menu for selecting a Communication Path. The menu is open, showing a list of options: U2S and S2S. The 'U2S' option is currently selected and highlighted with a blue background. The dropdown has a small upward and downward arrow icon in the top right corner.

# 1. Manage Trader Preferences

## Access Point Configuration - Add Communication Path

### ✓ Party Id

Enter the Party Id to be used as a default communication path for the Business domain and Communication Path selected

### ✓ Cancel Button

Click to close the pop-up without adding an Access Point

### ✓ Add Button

Click to add the Default Communication Path into the Default Communication Path grid and close the pop-up

## 2. Register Conf Test Campaign

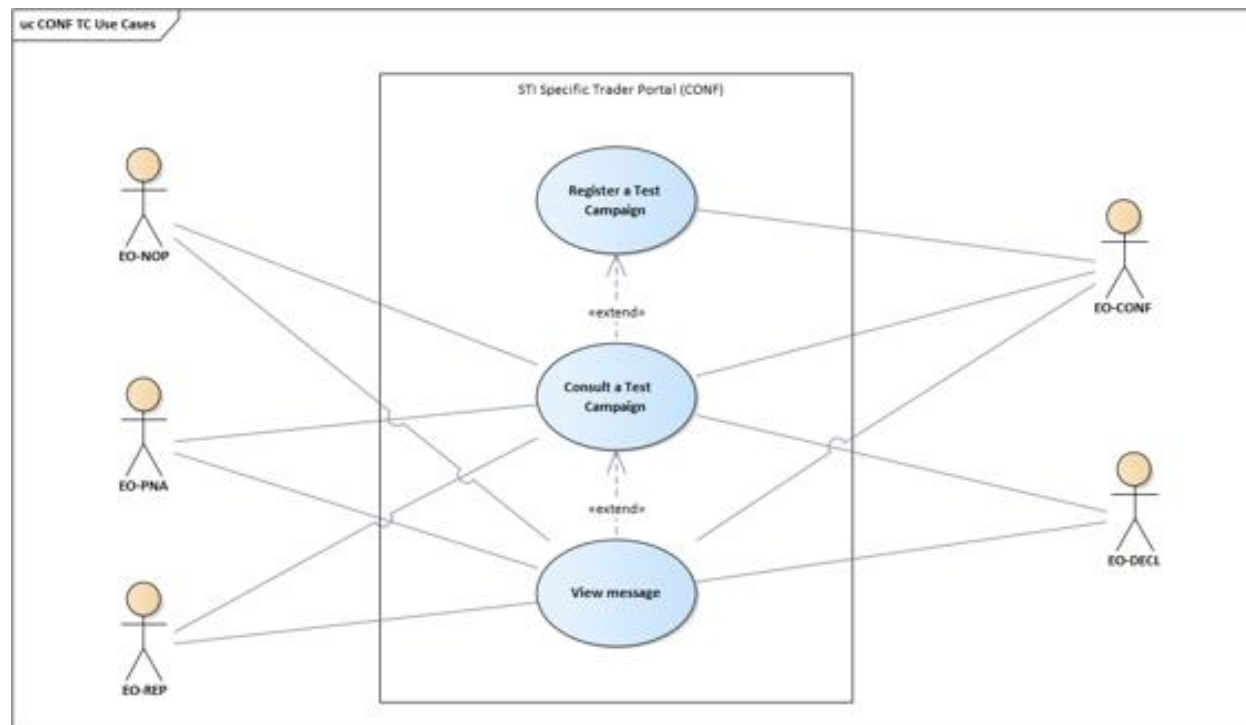

The “Register a Self-Conformance Test Campaign” is where the user can self-register a Conformance Test Campaign.

The user is able to navigate to the next or to the previous step in order to fully fill in the required information to self-register. Each time a user navigates away from one step, the system performs client-side validation of the fields of this step and notifies the user if the step includes validation errors or not. Visual marks (e.g. “red X” or “green check”) appear on the top of the steps of the ENS Filing.

With the **EO-CONF (EO-Configurator)** role a user can register a Conformance Test Campaign using STI-STP.

This action is applicable only in the Conformance environment.

## 2. Register Conf Test Campaign

## 2. Register Conf Test Campaign

### Pre-Conditions:

- The Actor is successfully logged into EUCTP via UUM&DS authentication and identification, in the Conformance environment.
- The Actor's STI-STP role EO-DECL, EO-REP or EO-CONF, required for this Use Case, is identified.
- STI-STP is successfully connected to STI, in the Conformance environment.
- There is an active EO CTC loaded in STI, Conformance environment. Business roles and Business Scenarios are configured in the STI-STP system.
- The AS4 connectivity between the EO system and ICS2 is in place (EO System certificate is properly registered in UUM&DS).

## 2. Register Conf Test Campaign

- ✓ The user selects “Conformance Tests” from the STI-STP main menu
- The system presents:
  - Fixed message at the top *“For the execution of this Conformance Test Campaign, first make sure you register a certificate and perform the technical connectivity test.”*
  - The information related to the active EO CTC:
    - Name (e.g. CTC for Release 3)
    - Start Date
    - End Date

## 2. Register Conf Test Campaign

- **The configuration fields to be provided for the Campaign Registration:**
  - Sender PartyID
  - Pmode configuration (read-only field)
  - Message Exchange Pattern (MEP): either push or pull
  - Endpoint (URL)
  - TLS Client Certificate (read-only field)
- A **“Register” button, only enabled in case the configuration fields are filled**
- **An empty CONF Test Campaign grid**
- **A link to the CIRCABC (which will lead to a public access dedicated folder named “ICS2 R3 EO Self-Conformance”)**

In case no active EO CTC is loaded in STI, because CONF DB is sometimes cleaned or due to current date is out of the validity range date for the EO CTC, the data will be empty, and the Register button will be disabled.

## 2. Register Conformance Test Campaign

- ✓ The Actor fills in the configuration fields and selects a CONF Test Campaign to register it
- The system presents the available Business roles for the active EO CTC:
  - Carrier
  - Express Operator
  - House Filer
  - Notify Party
  - Person Notifying the Arrival
  - Postal Operator

## 2. Register Conformance Test Campaign

- ✓ The Actor selects the **Express Operator** Business role
- System displays a grid listing the business scenarios according to the Business Role selection
- ✓ The Actor selects “Next” button option
- The system presents the required Business Scenario for the selected role. The system renders a grid with the list of those messages, included in the definition of the Test Case for this Business Scenario, that required an Identifier to be filled in:
  - Business Scenario
  - Message sequence
  - Message type
  - Status (Set up pending)
  - Actions (Fill Identifier)

## 2. Register Conformance Test Campaign

- ✓ The Actor selects the **Carrier** Business role
- The system presents a list with the ENS Filings available for Conformance related to Carrier
- ✓ The Actor selects one ENS Filing from the list and selects “Next” button option
- For each ENS Filing type selected by the Actor, the system displays a grid listing the business scenarios
- The system renders a list with the Business Scenarios corresponding to the ENS Filing requiring an Identifier:
  - ENS Filing;
  - Business Scenario
  - Message sequence
  - Message type
  - Status (Set up pending)
  - Actions (Fill Identifier)

## 2. Register Conformance Test Campaign

- ✓ The Actor selects the **House Filer** Business role
- The system presents a list with the ENS Filings available for Conformance related to House Filer
- ✓ The Actor selects one ENS Filing from the list and selects “Next” button option
- For each ENS Filing type selected by the Actor, the system displays a grid listing the business scenarios
- The system renders a list with the Business Scenarios corresponding to the ENS Filing requiring an Identifier:
  - ENS Filing;
  - Business Scenario
  - Message sequence
  - Message type
  - Status (Set up pending)
  - Actions (Fill Identifier)

## 2. Register Conformance Test Campaign

- ✓ The Actor selects the **Postal Operator** Business role
- System displays a grid, listing the business scenarios according to the Business Role selection
- ✓ The Actor selects “Next” button option
- The system presents the required Business Scenario for the selected role. The system renders a grid with the list of those messages, included in the definition of the Test Case for this Business Scenario, that required an Identifier to be informed by the Actor:
  - Business Scenario
  - Message sequence
  - Message type
  - Status (Set up pending)
  - Actions (Fill Identifier)

## 2. Register Conformance Test Campaign

- ✓ For the Business Roles: **Express Operator, Carrier, House Filer, Postal Operator** the Actor fills all or some Identifiers and saves the grid
- The system presents the information of the registered CONF Test Campaign in a grid with:
  - Business role
  - ENS Filing (only applicable and filled with values for Carrier and House Filer business roles)
  - Registration date
  - Status (Ready for execution)
  - Actions (View)

## 2. Register Conformance Test Campaign

- ✓ The Actor selects the **Notify Party** Business role
- System displays a grid, listing the business scenarios according to the Business Role selection
- ✓ The Actor selects a Business Scenario
- The system displays a confirmation dialogue to the Actor requesting the Actor confirmation to proceed with the Business Scenario execution.
- The system displays the message: *“For this Business Role there are no identifiers to be configured by you. Please press Finish Configuration to confirm the Registration.”*

## 2. Register Conformance Test Campaign

- ✓ The Actor selects the **Person Notifying the Arrival** Business role
- System displays a grid, listing the business scenarios according to the Business Role selection
- ✓ The Actor selects a Business Scenario
- The system displays a confirmation dialogue to the Actor requesting the Actor confirmation to proceed with the Business Scenario execution. The system displays the information message: *“For this Business Role there are no identifiers to be configured by you. Please press Finish Configuration to confirm the Registration.”*

The Actor is self-registered with one of the referred selected Business roles and is ready to start the Conformance Test Campaign.

## 2. Register Conformance Test Campaign

For the cases where the following pre-condition is not fulfilled:

- *“There is an active EO CTC loaded in STI, Conformance environment. Business roles and Business Scenarios are configured in the STI-STP system.”*

The System displays a message informing the Actor. The informative message contains the following content: *"There is no Conformance Test Campaign active at this moment. Please mind to request the registration of a Conformance Test Campaign prior to scenarios configuration."*

- Sender Party ID field, is a drop-down list containing all Party IDs (based on Manage Trader Preferences configuration). Filter is used in order to present Party IDs with the same EORI as the EORI of the user configuring the Self-CTC. The first value of the drop-down will appear as default.
- Pmode configuration fields will appear as read-only and filled with selected Sender Party ID data.
- TLS Client Certificate, is a read-only field, filled with the data of the selected Sender Party ID.

## 2. Register Conformance Test Campaign

The specification (Connectivity Test Cases, Business roles, Business Scenario and sample data) of the EO CTC is available in EO-CTS artefact (*ICS2 Test Design Specifications for Economic Operator Conformance Test Scenarios R2*).

The representation below intends to present a summary of the Business Scenarios required per business role: Postal Operator, Notify Party, Express Operator and Person Notifying the Arrival:

In terms of Carrier and House Filer, the required business flows are presented per ENS Filing type:

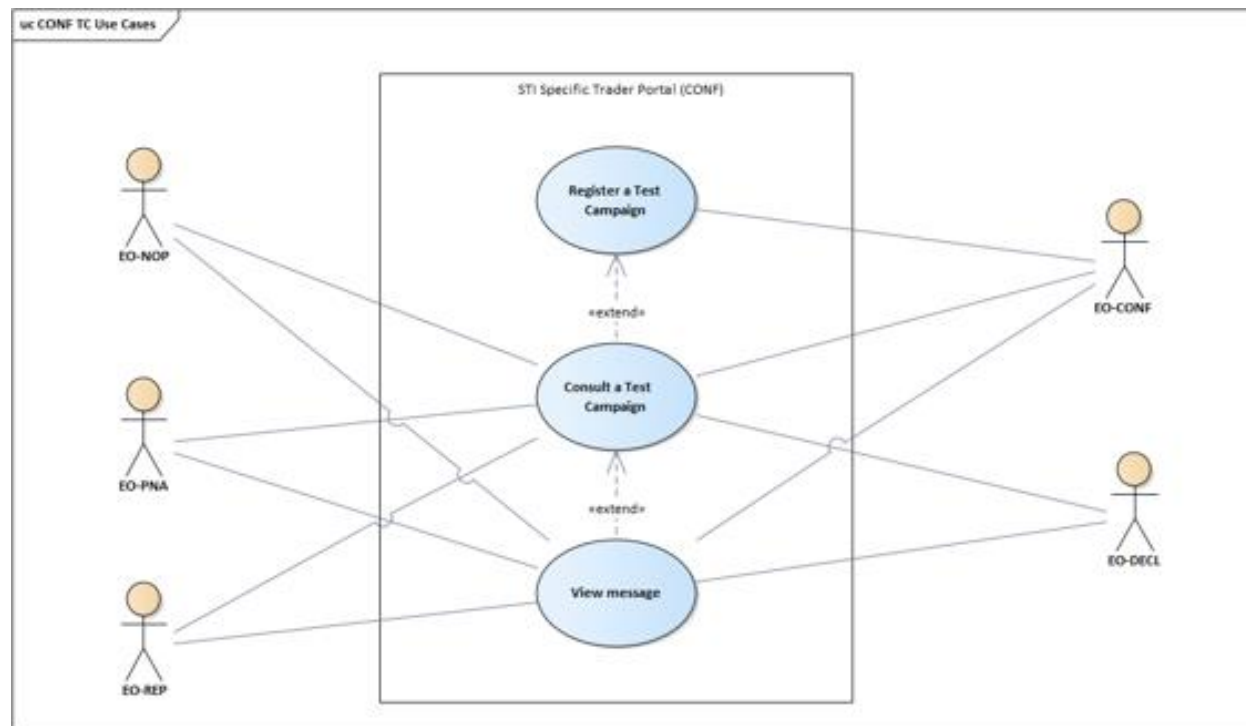

### 3. Consult Conformance Test Campaign

The Test Campaign Business Scenarios is the area where the user can consult the Business Scenarios details of a registered Self-Conformance Test Campaign. As the Self-Conformance Test Campaign page, **this page also is only available in the Conformance Environment.**

With the **EO-DECL (EO-Declarant)**, **EO-REP (EO-Representative)**, **EO-CONF (EO-Configurator)**, **EO-PNA (EO-Person Notifying Arrival)** or **EO-NOP (EO-Notifying Party)** roles a user can consult a Conformance Test Campaign using STI-STP.

### 3. Consult Conformance Test Campaign

### 3. Consult Conformance Test Campaign

The Actor decides to consult a Conformance Test Campaign.

The system renders information about the Campaign in which the Actor is registered at the level of Business role, Scenario and Message.

#### **Pre-Conditions:**

- The Actor is successfully logged into EUCTP via UUM&DS authentication and identification, in the Conformance environment.
- The Actor's STI-STP role EO-DECL, EO-REP or EO-CONF, required for this UC, is identified.
- STI-STP is successfully connected to STI, in the Conformance environment.
- There is an active EO CTC loaded in STI, Conformance environment. Business roles and Business Scenarios configured in the STI-STP system.
- The AS4 connectivity between the EO system and ICS2 is in place (EO System certificate is properly registered in UUM&DS).

### 3. Consult Conformance Test Campaign

- ✓ The Actor selects “Conformance Tests” from the STI-STP main menu
- The system presents:
  - **The information related to the active EO CTC:**
    - Name
    - Start Date
    - End Date
  - **The test Campaign configuration fields:**
    - Sender PartyID
    - Pmode configuration
    - TLS Client Certificate

### 3. Consult Conformance Test Campaign

- A grid with the list of Business Scenarios where the Actor is registered:
  - Business role
  - ENS Filing
  - Registration date
  - Status (Ready for execution / In progress / Failed / Success)
  - Actions (View)
- A “Register” button.

## Self-Conformance Testing Campaign Management

Business role	ENS Filing	Registration date	Status	Actions
Express Operator	Express (F31 + F32) and Re-entry	9/11/23	Set up pending	<a href="#">View</a>
Carrier	F20	16/3/23	Set up pending	<a href="#">View</a>
Express Operator	N/A	21/2/23	Set up pending	<a href="#">View</a>
Carrier	F21	21/2/23	Set up pending	<a href="#">View</a>
Carrier	F28	13/12/22	Set up pending	<a href="#">View</a>
Express Operator	N/A	30/11/22	Set up pending	<a href="#">View</a>

### 3. Consult Conformance Test Campaign

- ✓ The Actor selects to View a Failed/Success message
- System provides, in read only mode, the ENS Filing form associated with current ENS Filing.

[for all messages]

- The data of one message is presented to the Actor in read only mode.

- **The Actor with EO-CONF role is not able to View a Failed/Success message**

### 3. Consult Conformance Test Campaign

The list only contains messages for which:

- The EORI of the EO-DECL logged in user matches the declarant EORI
- The EORI of the EO-REP logged in user matches the representative EORI

Except for the messages below:

- IE3N03, IE3N09, IE3Q01 and IE3R01:
  - The EORI of the EO-DECL logged in user must match either the declarant or the Carrier Identification Number
  - The EORI of the EO-REP logged in user must match the representative
- IE3N04, IE3N05: the EORI of the EO-DECL or EO-REP logged in user must match the Carrier Identification Number
- IE3N08, IE3R04: the EORI of the EO-DECL or EO-REP logged in user must match the Person Notifying the Arrival Identification Number
- IE3N11: the EORI of the EO-DECL or EO-REP logged in user must match the Supplementary Declarant (person not yet filed) Identification Number

### 3. Consult Conformance Test Campaign

- ✓ The Actor is not registered in any Campaign
  - The Test Campaign grid is empty
- ✓ The Actor selects to export the grid with the list of Business Scenarios
  - System uses EUCTP functionality to export list of Business Scenarios in CSV format
- ✓ The Actor (Business Role “Person notifying the Arrival”, “Notify Party” or “House Filer” (when ENS Filing is “F22 ENS Pending notification” or “F26 ENS Pending notification”)) selects to Launch Test for a specific Business Flow with Status Ready for Execution
  - System will initiate the ENS Registration to be mocked. Then the system will change the Status into “In Progress”
- ✓ The Actor selects to export the grid with the list of messages included in the “Business Scenario”
  - System uses EUCTP functionality to export list of Messages in CSV format

### 3. Consult Conformance Test Campaign

#### View Business Flows: Person Notifying the Arrival

The screenshot shows the EU Trader Portal interface. The top navigation bar includes the European Commission logo and the text "TAXATION AND CUSTOMS UNION". The user is logged in as "Trader Fullname (v0420257)" in English. The left sidebar lists various options, with "Self-Conformance Test" selected. The main content area displays a table titled "Test Campaign Business Scenarios" with the status "Ready for execution". A warning message states: "This functionality is only available in the Conformance environment".

ENS Filing	Description	Status	Actions
N/A	Person Notifying the Arrival	Ready for execution	<a href="#">View Launch test</a>

### 3. Consult Conformance Test Campaign

#### View Business Flows: F22 (With Launch Test)

EU Trader Portal

http://ec-euctp.priv.7777/

You are logged-in as Trader Fulname (v0420257) English

EU Trader Portal > Self-Conformance Test Campaign

Back

This functionality is only available in the Conformance environment

Test Campaign Business Scenarios Status Ready for execution

Business role House Filer  
ENS Filing F22

Only for Business Scenarios  
- with the initial ENS Registration to be mocked  
- with Status Ready for Execution

ENS Filing	Description	Status	Actions
F22	Most Common flow (Mandatory basis)	Ready for execution	<a href="#">View</a>
F22	Referrals	Ready for execution	<a href="#">View</a>
F22	Amendment and Invalidation	Ready for execution	<a href="#">View</a>
F22	AEO Control Notification	Ready for execution	<a href="#">View</a>
F22	ENS Not Complete Notification	Ready for execution	<a href="#">View Launch test</a>
F22	ENS Pending Notification	Ready for execution	<a href="#">View</a>

### 3. Consult Conformance Test Campaign

- ✓ The Actor selects to fill the Identifier of a message with Status Set up pending
  - The system updates the entry in the messages grid with the value of the Identifier and sets the Status to Execution pending.
  
- ✓ The Actor selects to Update the Identifier of a message with Status Execution pending or Failed.
  - The system updates the entry in the messages grid with the new value of the Identifier. If the Status of the message was Failed, the system updates it to Execution pending.

### 3. Consult Conformance Test Campaign

- ✓ The Actor clicks the Reset Business Scenario button
  - The system removes all the Identifiers in the Business Scenario and sets the Status of all the messages to Set up pending or Execution pending. If the flow has the initial ENS registration to be mocked, the system also launches the flow.
  
- ✓ The Actor clicks the Refresh icon button
  - The system updates according the business flow. Depending the situation, user may receive a new MRN or a follow-up to the execution of the messages.

### 3. Consult Conformance Test Campaign

#### View Message Flow

EU Trader Portal

34	IE3N07 - House Consignment In Incorrect State Notification					Execution pending	

Please use this Identifier as Related MRN

Reset Flow

### 3. Consult Conformance Test Campaign

The available Action to the Actor, for each Message, depends on its Status and Type:

Status	Type	Action
Set up pending	Requires Identifier	Fill Identifier
Execution pending	Requires Identifier	Update Identifier
Execution pending	No Identifier required	(no action)
Failed	Requires Identifier	View Update Identifier
Failed	No Identifier required	View
Success	(all types)	View

The Actor follows up the progression of the execution of his Test Campaign

### 3. Consult Conformance Test Campaign

The specifications (Business roles, Business Scenarios, Scenarios and message flows) of the Economic Operator Conformance Test Campaign is available in EO-CTS artefact (*ICS2 Test Design Specifications for Economic Operator Conformance Test Scenarios R3*)

The transition of the Message Status to Failed/Success is managed by STI.

The Status values and possible transitions are defined below:

# Conformance Baseline – CFSS/CTSS

## Source of Documentation & Material

EOs should visit these webpages and familiarize themselves on the terminology and the ICS2 components that will use to access and consult
