

# Summary Declaration for Temporary Storage using the web channel

Sea Traffic

# How to access the web channel?

The link to the web declaration service can be found on the Customs website ([www.tulli.fi](http://www.tulli.fi)). The start page for all the declarations can be accessed through the following path: Yrityksille > Sähköinen asiointi > Internet-asiointi

The screenshot shows the Tulli website interface. At the top, there is a navigation bar with the Tulli logo and the text 'TULLI TULL • CUSTOMS'. Below the logo, there are links for 'Yksityisille' and 'Yrityksille', and a breadcrumb trail: 'Suomen tulli > Yhteystiedot ja palaute >'. A secondary navigation bar contains buttons for 'Asiakkaana Tullissa', 'Tuonti', 'Vienti', 'Muut tullimenettelyt', 'Verotus', and 'Sähköinen asiointi'. The 'Sähköinen asiointi' button is highlighted in yellow. Below this, a yellow sidebar menu lists various services, with 'Sähköinen asiointi' expanded to show 'Internet-asiointi' as a sub-option. The main content area shows the path 'Yrityksille > Sähköinen asiointi > Internet-asiointi' and a section titled 'Internet-asiointi' with a description of the service. To the right, there is a box for 'Uusia nettipalveluita' listing 'AREX', 'EMCS', and 'Nettiventti'. Below this, a section titled 'Tulli-ilmoittaminen' contains a table with two columns: 'Ilmoituksen täyttämisen nettilomakkeella' and 'Tiedoston lähettäminen Tulliin'. The table lists various declaration types and their corresponding submission methods.

Ilmoituksen täyttämisen nettilomakkeella	Tiedoston lähettäminen Tulliin
AREX (saapumisen ja poistumisen ilmoitukset)	
EMCS (valmisteverottomien tuotteiden siirrot)	
Nettiventti (vientii-ilmoitus)	
Nettipassitus (passitusilmoitus)	
Intrastat-tilastoilmoittaminen (tellaTYVI-palvelu)	Intrastat-tilastoilmoitus ascii- tai csv-tiedostona
PortNet (alusselvitys)	

Summary declarations for temporary storage must be completed using the "AREX (entry and exit declarations)" service.

The service can also be accessed via the 'Netti-AREX' link at the bottom of the customs front page through the favourite sites list.

# Application specific front pages

- On the front page of the AREX web service, you will find e. g.
  - General information on the application,
  - Link to the user's guide, under which you will find e. g.
    - Frequently asked questions
    - User's guide and terms of use
    - Instructions on how to order a Katso ID
    - Examples of acceptable goods descriptions for summary declarations
  - Links to the TARIC database of the EU (to find the correct description of goods)
  - System notices (for example information on non-availability)
  - Contact information of the call centre (AREX: 020 690 629 (Mon-Fri 8:00-18:00))
  - Language choice for the user interface (Finnish, Swedish or English)
  - The 'Log in using KATSO ID' link
    - Without the Katso ID, only entry summary declarations can be completed for goods arriving by road
- Users logged in using the KATSO ID will first see the details of the business associated with the ID and after this:
  - 'Search' tab
  - 'Selection of declaration type' tab.
  - 'Drafts' tab

## Types of declarations that can be made using the AREX web service

For vessels arriving by sea shall be provided

- either an entry summary declaration prior to the arrival of a vessel at a Finnish port directly from a non-EU port
- or a Summary Declaration for Temporary Storage prior to the arrival of a vessel at a Finnish port from another EU port
- an Arrival notification and presentation always when a vessel arrives at a port
- and, in few cases, a Diversion Request Import

All exit declarations are used for goods carried by sea

# AREX Summary Declaration for Temporary Storage: Basic information

- Transaction identifier (Customs reference number): if an identified user with Katso ID corrects a declaration lodged earlier, the transaction identifier issued to the declaration can be seen here
- LRN (Local Reference Number): the unique reference number allocated by the person responsible for lodging a declaration or his representative: can be a consecutive number allocated by the declarant to their declarations, or another reference number identifying the declaration, e. g. bill of lading number
- Conveyance reference number: not to be used for sea transport (for rail transport the rail wagon number, for air transport the flight number)
- Total gross mass: the total gross mass of the goods items on the whole declaration
- Total number of manifest items: the number of manifest items to be declared, in practice, the number of manifest items to be completed. Please note: one manifest item may contain several goods items, which are not included into the total number.
- Total number of packages: the sum of all number of packages declared in manifest item basic information
- 
- Transport mode at border: 1 = Sea transport
- Customs office of entry: select from the drop down list the code of the customs office of entry supervising the port
- Expected arrival date and time: enter the time of the arrival of the vessel

Carrier and representative can only be provided in basic information; Consignor, consignee and notify party shall be provided in manifest item trader details or for goods items if the trader details differ between goods items.

Carrier and representative must have an EORI number

Representative can be displayed by clicking 'Display'.

You only need to enter the EORI number. Other details will appear after the declaration has been successfully submitted and EORI number recognised.

- Name and phone number should be provided in declaration contact person's details. Your email address will help us if we need to contact you.
- Country/TIN/Extension: The EORI number must be provided here, if it is available.
  - The country code prefix of the EORI number issuing country, e.g. FI, must be entered in the 'Country' box
  - The numbers following the EORI number prefix should be entered in the 'TIN' box ("Trader Identification Number") (in Finland Business ID, with hyphen, in the format: 1234567-8)
  - The 'Extension' box is usually left blank when a Summary Declaration for Temporary Storage is completed
    - This box is to be completed only in cases where the declarant has been authorised by Finnish Customs to use the AREX system (this is not required from declarant using the web channel to lodge AREX declarations; it only concerns declarations for storage of goods).
- The consignor and consignee details: must be declared in manifest item basic information, where the same consignor and consignee are declared for all goods items of the manifest item. Otherwise, the details must be provided at goods item level.

## Carrier at entry and representative on Summary Declaration for Temporary Storage IE344

In the table \* = person responsible for lodging a declaration

Case	Field: Carrier	Field: Representative
Sea carrier A* issuing the B/L; A operating their own vessel, A submitting declarations on their own behalf	A	-
Sea carrier A* issuing the B/L; sea carrier B operating the vessel with carrier A sharing or leasing space on board the vessel; A submitting declarations on their own behalf	A	-
Sea carrier A* issuing the B/L; sea carrier B operating the vessel with carrier A sharing or leasing space on board the vessel; A using agent to submit declarations on their behalf	A	C
Sea carrier A* issuing the B/L; sea carrier B operating the vessel with carrier A sharing or leasing space on board the vessel. A has given their consent to sea carrier B to lodge a Summary Declaration for Temporary Storage for goods on the B/L issued by A	A	B
Combination of vehicles of road carrier D* driven onto vessel operated by sea carrier B, D submitting declarations on their own behalf	D	-

The screenshot shows the TULLI AREX system interface. At the top, there are navigation tabs: 'Etusivu', 'Haku', and 'Ilmoitus'. On the left, a sidebar menu shows '344 Yleisilmoitus' with sub-items: 'Ilmoituksen pääsivu', 'Perustiedot', 'Manifestierät', 'Erälista' (highlighted), and 'Yhteenveto ja lähettäminen'. The main content area is titled 'Erälista' and contains the text 'Tähän ilmoitukseen liittyvät seuraavat manifestierät'. Below this, there is a label '# MRN:t ja LRN:t' and a button 'Lisää manifestierä'. At the bottom, there are two navigation buttons: '« Edellinen' and 'Seuraava »'.

- 9 999 manifest items can be declared in one declaration.
- A declaration can be provided either for the whole vessel or for a manifest or bill of lading or container.

Transport document code e.g. N704, N705, N710 or N714 and document number are mandatory.

Click 'Add import operation', in order to enter data elements for an item.

By clicking **'Next'**, the user can move to the next page. After clicking this button, the application will save details on the page and display an error message if mandatory data elements are missing. A click on the **'Save as a draft'** button will also save the data of an unfinished declaration as a draft and the user can continue entering the data later.

- Import operation:
  - One manifest item may contain max 999 import operations
  - For each import operation shall be declared either
    - LRN (Local Reference Number): the unique reference number allocated by the person responsible for lodging a declaration or his representative: can be a consecutive number allocated by the declarant to their declarations, or another reference number identifying the declaration, e. g. bill of lading number, or
    - MRN and the corresponding goods item sequence number referring to MRN issued at the office of first entry for the entry summary declaration and goods item number, if goods are transported on the same means of transport to subsequent offices of entry.

Enter the date and time of the lodgement of the declaration. If the MRN issued for an entry summary declaration lodged earlier has been declared for an import operation, the date and time of the previous declaration must be entered.

If the MRN issued for an entry summary declaration lodged earlier has been declared for an import operation, the date of entry and country of the previous declaration must be entered, otherwise this field is left blank.

If different items of goods have different places of loading and unloading, this information should be provided at item level, not in the basic information for the whole manifest item.

- Specific circumstances: the field is usually left blank
  - If the carrier, declarant and consignee have been granted AEO status, code 'E' can be used here
- Unique consignment reference number (UCR): the field is left blank unless an UCR reference number generated in accordance with a certain standard recommended by the World Customs Organization WCO has been allocated to the declaration (in this case the bill of lading number must be entered in the 'Produced documents/certificates' field in the goods item details)
- Total number of goods items: number of items to be declared, in practice, number of item tabs to be completed
- Total number of packages: The total number of packages is the sum of the number of packages + the number of pieces entered for the goods items + value "1" for each bulk product
- Total gross mass: the sum of the gross masses declared for each of the goods items. If the actual gross mass is not known, value '0' should be entered.
- Identity of active means of transport crossing the border: the seven-digit vessel's International Maritime Organisation (IMO) number or the eight-digit unique European Vessel Identification Number (ENI). The nationality of the means of transport is not required for sea transport.
- Place of loading and place of unloading: Maximum length 35 is characters, enter the country code first (e.g. RU, FI), then the name of the place of loading/place of unloading, e. g. FITurku
  - Place of loading and place of unloading mean the port where goods are loaded and unloaded from the vessel used for their carriage.
  - If different items of goods have different places of loading and unloading, this information should be provided at item level, not in the basic information for the whole declaration.

Consignor and consignee can be provided here at whole item level or for each goods item if the trader details differ between items.

Consignor, consignee and notify party do not need to have an EORI number. If the EORI number is used the trader fields should be left blank. The notify party should only be provided if another party is notified of the arrival of the goods, e.g. when a negotiable bill of lading has been issued.

You only need to enter the EORI number. Other details will appear after the declaration has been successfully submitted and EORI number recognised.

Predictive text input: enter at least two characters in the field, and a menu will pop up from which you can select the correct alternative. For example, when you enter DE, both the DE code for the Federal Republic of Germany and a list of countries containing letters de will appear

Country of loading and unloading are mandatory data elements. Place of loading, place of unloading, consignor, consignee and notify party data elements should be provided at goods item level, if they could not be provided in the basic information for all the goods items on the manifest item

- Commodity code / Goods description: one of the fields must be completed
  - provision of the commodity code is recommended, at the level of at least 4 digits
- UN dangerous goods code (UNDG) shall be provided if you are carrying any of the substances and articles on the list of the dangerous goods most commonly carried.
- Customs status:
  - shall be left blank, or
  - if the declaration is also used as shipping company's manifest to prove the Community status of goods, code 'C' must be entered, when Community goods have earlier been loaded on board, and their Community status can be proved by means of shipping company's manifest and the sea carrier has been authorised in accordance with Article 324c or 324d CCIP to use documents proving Community status of goods without having to present them for endorsement. In this case, a reference to the authorisation must be made entering code 2YMM in the 'Document reference' field. If non-Community goods are transported or their Community status cannot be proved, code 'N' must be entered.
  - if the declaration is used for sea simplified transit procedure (Article 448 CCIP) each goods item must be identified with the customs status code (C, X, TD, T1 or TF). In this case, a reference to the authorisation must be made entering code 7MYP and the number of the authorisation in the 'Document reference' field.
- Gross mass: the gross mass of each of the goods items. If the actual gross mass is not known, value '0' should be entered.
- Transport charges method of payment: must be declared if known. Cannot be provided here, if the data element has been entered in the basic information for the manifest item.

Special mentions code is not used for sea transport.

Container identifier and seal numbers are not mandatory data elements.

- Kind of packages: Select the correct package code from the drop down list
  - For example: CS = case; LG =log; VO = bulk, solid, large particles; NE =unpacked; PX = pallet etc.
  - Package code may not be entered only in case of postal consignments or ship and aircraft supplies (Specific Circumstance Indicator code in the basic information is A or B)
- Number of packages: only for packaged goods
- Number of pieces: should be declared only for unpackaged goods NE, NF or NG.
- If the package type is bulk VQ, VG, VL, VY, VR or VO, the number of packages or number of pieces should not be entered.
- Marks and numbers of packages: must be entered for packaged goods. Is not required for unpackaged goods or bulk. If goods are containerized, only the container number has to be provided.
- Produced documents/certificates: at least one transport document code e.g. N704, N705, N710 or N714 and document number must be declared for sea transport.
  - If the sea carrier has been authorised in accordance with Article 324c or 324d CCIP to use documents proving Community status of goods without having to present them for endorsement, code 2YMM should be used as the 'Produced documents/certificates' code and entry "324c" or "324d", depending on which authorisation has been obtained, as the document number.
  - If the sea carrier has been authorised in accordance with Article 448 to use sea simplified transit procedure, code 7MYP and the authorisation number should be used as the 'Produced documents/certificates' code.
  - Portnet number must be declared using code 1PNU, if known.
  - Other transport documents can also be declared here.

# AREX, search page (identified user logged in using Katso ID)

- If a declaration reference or a transaction ID has been entered as a search criterion, the time interval in which the declaration was submitted doesn't need to be set in order to limit the search
  - In other cases, the start and end dates of the intervals must be set by either entering the date in the format dd.mm.yyyy or by selecting the desired date in the calendar on the side.
- After the search criteria have been entered, start the search by clicking the 'Search' or 'Search within the date range' button.
- It's recommended to use as few search criteria as possible.
- If the search doesn't return any results or if there are flaws in the search criteria, the AREX application will notify of the error.
- The search results will be shown in a separate table at the bottom of the page.
