

## Notification of the amount of unlevied customs duties

End-use

Authorisation holder

Business ID

Authorisation number

Name of contact person

Telephone number

Email address

Under the end-use procedure, certain goods can be imported from outside the EU and released for free circulation at a reduced or zero rate of duty, provided that they will be used for a specific purpose or in a particular context.

The reference amount for the end-use procedure is the maximum amount of unlevied import duties for goods simultaneously under the procedure. Unlevied import duties means the difference between the general customs duty and a possible anti-dumping duty, and the reduced rate of duty for end-use.

According to the customer's guarantee category, a guarantee of 0% / 30% / 50% / 100% of the reference amount is required.

In connection with customs clearance, the amount of 0% / 30% / 50% / 100% of the customs liability is reserved from the customer's comprehensive guarantee for the end-use customs liability according to guarantee category. The reservation from the comprehensive guarantee is released when the liability has ceased, i.e. when the end-use procedure is discharged accordingly and when an acceptable bill of discharge is submitted. Release for an end-use procedure is not possible if there is not a sufficient amount of comprehensive guarantee available for reserving a new guarantee.

The authorisation holder must supervise the reference amount. The authority holder must ensure that the total amount of unlevied import duties for goods simultaneously under the end use procedure does not exceed the maximum amount indicated on the form.

We ask you to indicate reference amount for the maximum amount of unlevied import duties so that the required guarantee can be defined.
