Level 0	RDO	Format	Path	(General type) tag	type
MESSAGE 1X	**R**				
Message sender	R	an..35	Message	sender	lineType
Message sender's EDI-identity as defined by ISO-standard 6523. The ICD of the registry's administrator (0037) is followed by the business ID without the dash. If using direct messaging (WebService), the traders EORI identification, which in Finland consists of a country code and Business ID or VAT number, (e.g FI1234567-8) is used as identification.					
Message recipient	R	an..35	Message	recipient	lineType
Message recipient's EDI-identification as defined by ISO-standard 6523. The ICD of the registry's administrator is followed by the business ID without the dash. In trader to Customs messages the value is 003702454428. If using direct messaging (WebService), the traders EORI identification, which in Finland consists of a country code and Business ID or VAT number, (e.g FI1234567-8) is used as identification. Customs' identification is in this case FI0245442-8.					
Date and time of preparation	R	dateTime	Message	issue	dateTime
Interchange control reference	O	an..14	Message	controlReference	lineType
Used only in Customs' response messages. This is the value of 'Message identification' of the declaration message that the response refers to.					
Test indicator	R	n1	Message	test	code
In case of testing message interchange, enter code 1. ELSE (in production), enter code 0.					
Message identification	R	an..14	Message	reference	lineType
Unique identification of message. A five-character string assigned by Customs is followed by a reference number assigned by the message sender. The data element can contain only alphanumeric characters. In Customs' response messages this is a unique identifier for the interchange defined by Customs. When using direct messaging services (WebService), the freeform identification must always be nine characters, making the total length of the identification exactly 14 characters.

LRN (Local reference number)			R	an..22	[Declaration] Document	reference	lineType

R891: The Local Reference Number (LRN)/Diversion LRNArrival LRN shall be a number/identifier allocated by the sending TRADER for a specific transaction (ENS, Arrival Notification). It shall be unique per Trader sending the transaction.

Dialog language indicator at destination			D	a2	Declaration	language	languageCode

Code list 0036

The attribute is used as the basic language to be used in any further communication between the Trader and the Customs system. If the trader does not use this attribute then the Customs system will use the default language.

Identity of means of transport crossing border			D	an..27	[Declaration] BorderTransport Means	(TransportMeans) identity	transportMeansIdentifier

IF 'Transport mode at border' = '1', '3' or '8', THEN this data = 'R', ELSE this data = 'O'.

IF 'Transport mode at border' = '1' or '8'
THEN the attribute consists either of the International Maritime Organisation (IMO) ship identification number (format n7 - leading '0' allowed) or of the European Vessel Identification Number (ENI) (format n8 - leading '0' allowed)
IF 'Transport mode at border' = '3'
THEN the attribute consists of the registration plate number and has no format restrictions
IF 'Transport mode at border' = '2'
THEN the attribute consist of one wagon number and has no format restrictions
ELSE no format restrictions

Total number of items			R	n..5	Declaration	goodsItem	quantity
Total number of packages			R	n..7	[Declaration] DeclarationPackaging	(Packaging) packages	quantity

The total number of packages is the number of all packages that were declared unloaded in this declaration. The total number of packages is equal to the sum of all 'Number of packages' + all 'Number of pieces' + a value of '1' for each declared 'bulk'.

If unloading remarks is given for only one container and goods are missing, enter value '0'.

Conveyance reference number			D	an..35	[Declaration] BorderTransportMeans	journey	lineType

TR0518: IF 'Transport mode at border' = '4'
THEN the attribute has format an..8 AND the string must contain the carrier code (an..3), the flight number (n..4) and an optional suffix (a1) without any separator between the two or three trimmed elements.

TR0519: IF 'Transport mode at border' = '1' AND 'Conveyance reference number' is used AND the first four digits consist of XFER in uppercase
THEN the first four digits shall consist of 'XFER' in uppercase, followed by the lorry registration plate number
ELSE 'XFER' cannot be used.

IF 'Transport mode at border' = '2', THEN either 'Identity of means of transport crossing border' or 'Conveyance reference number' must be used.

R843: The 'Conveyance Reference Number' is the identification of the journey of the means of transport (e.g. flight number, train number, voyage number, trip number).

Place of unloading			O	an..35	[Declaration] UnloadingLocation	(Location) name	text

R670: The first two digits of the 'Place of loading' and 'Place of unloading' shall consist of the country code followed by the name of a seaport, airport, freight terminal, rail station or other place.

The first two digits must be capital letters.

Unloading date and time			R	dateTime	[Declaration] BorderTransportMeans	unload	dateTime
Warehouse reference number			R	an..17	[Declaration] Warehouse	identification	identifier
Warehouse TIN extension			R	an5	[Declaration] Warehouse	identitification Extension	identifierExtension

Warehouse keeper must have authorization for temporary warehousing.

CUSTOMS DATA REFERENCE [SUMMARY DECLARATION] 9999X			**R**				

Level 1	Level 2	Level 3	RDO	Format	Path	(General type) tag	type
Reference number MRN			R	an18	[GoodsShipment] Consignment	MRN	mrn
	GOODS ITEM 999X		**R**				
	Reference number (MRN) item number		R	n..5	[GoodsShip-ment.Consignment] ConsignmentItem	sequence	numeric
	Item condition indicator		R	an..5	[GoodsShipment. Consignment] Con-signmentItem	condition	indicatorCode

If 'GOODS ITEM.Item condition indicator' = '0' or 'false', other details related to goods = 'R'. In this case at least one data element or data group with discrepancies noticed at unloading, related to goods item in question, must be entered together with its true value discovered at time of unloading.
If 'GOODS ITEM.Item condition indicator' = '1' or 'true', details are not entered.

Following codes are used:
'0' or 'false' = Discrepancies are found
'1' or 'true'= No discrepancies are found.

	Goods description / Dis-crepancies		D	an..280	[GoodsShipment. Consignment. ConsignmentItem] Commodity	cargoDescription	text

If 'GOODS ITEM.Item condition indicator' = '0' or 'false', in addition to the goods description, enter also discrepancies discovered at time of unloading.
If 'GOODS ITEM.Item condition indicator' = '1' or 'true', details are not entered.

E.g. if missing goods in a container are detected, enter "[Container number] missing goods". If regarding excess goods, a container can be linked to a certain goods item, enter "[Container number] excess goods" here and the container number in field 'Container number'. If discrepancies related to data group 'Packages' are discovered, enter details regarding discrepancies here and the true packaging details that were discovered during unloading in the data group 'Packages'.

A plain language description that is precise enough for Customs services to be able to identify the goods. General terms (i.e. "consolidated","general cargo" or "parts") cannot be accepted. A list of such general terms is published by the Commission at web site:
http://ec.europa.eu/taxation_customs/resources/documents/customs/policy_issues/customs_security/acceptable_goods_description_guidelines_en.pdf

	Gross mass		D	n..11,3	[GoodsShipment. Consignment. ConsignmentItem] GoodsMeasure	grossMass	measure

If 'GOODS ITEM.Item condition indicator' = '0' or 'false' and if this data is relevant, then this data element = 'R'.
If 'GOODS ITEM.Item condition indicator' = '1' or 'true', then this data element is not used.

The gross mass discovered at time of unloading is entered.

	UN dangerous goods code		D	n4	[GoodsShipment. Consignment. ConsignmentItem] Commodity	UNDG	dangerousGoods Code

No code list available

R823: The United Nations Dangerous Goods Identifier (UNDG) is the unique serial number (n4) assigned within the United Nations to dangerous substances and articles. This element shall be provided where it is relevant.

If 'GOODS ITEM.Item condition indicator' = '0' or 'false' and if this data is relevant, then this data element = 'R'.
If 'GOODS ITEM.Item condition indicator' = '1' or 'true', then this data element is not used.

The UN dangerous goods code discovered at time of unloading is entered.

	Customs status		D	an..2	[GoodsShipment. Consignment] Con-signmentItem	communityStatus	CommunityStatus-CodeType

Code list 9995

R815: The attribute may be used to specify the Union status.

If 'GOODS ITEM.Item condition indicator' = '0' or 'false' and if this data is relevant, then this data element = R
If 'GOODS ITEM.Item condition indicator' = '1' or 'true', then this data element is not used.

The customs status discovered at time of unloading is entered.

		PRODUCED DOCU-MENTS / CERTIFI-CATES 99X	**D**				

If 'GOODS ITEM.Item condition indicator' = '0' or 'false' and this data group is relevant, THEN this data group is= 'R'.
If 'GOODS ITEM.Item condition indicator' = '1' or 'true', THEN this data group is not used.

Document type and document number discovered at time of unloading is entered.

		Document type	R	an..4	[GoodsShipment. Consignment. ConsignmentItem] AdditionalDocument	(Document) type	documentTypeCode

Code list 0006

R866: If the ENS is lodged by another party than the Carrier, then the transport document of the Carrier should be declared, if available.

R866: If the ENS is lodged by another party than the Carrier, then the transport document of the Carrier should be declared, if available.

The used transport documents are: N235, N271, N703, N704, N705, N710, N714, N720, N722, N730, N740, N741, N750, N760, N785, N787, N952, N955.

A shipping company, which as an authorised issuer has the permission to provide the customs status of union goods using a customs goods manifest (ie. a ship's manifest), may on the same declaration indicate both Union and non-Union goods. Besides the transport document each goods item must reference also to document code 2YMM. The number of the permit issued by Customs is entered as the document reference.
In other cases it is possible to declare Union goods on a separate entry summary declaration (IE315) or summary declaration for temporary storage (IE344). Besides the transport document, the goods item must contain a reference to a document proving the Union status of goods according to code list 0006. The document identification and the date in the format of ddmmyyyy are entered as document reference. In addition document code 2YMM is entered. "TA art. 199" is entered as its document reference.

If declaration is used as a low value declaration for courier companies, the permit for declarer of low value goods(code 7VTI) must be specified for all goods items.

HEADER [SUMMARY DECLARATION] 1X		**R**				
LRN (Local reference number)		R	an..22	[Declaration] Document	reference	lineType

R891: The Local Reference Number (LRN)/Diversion LRN/Arrival LRN shall be a number/identifier allocated by the sending TRADER for a specific transaction (ENS, Arrival Notification). It shall be unique per Trader sending the transaction.

Dialog language indicator at destination		D	a2	Declaration	language	languageCode

Code list 0036

The attribute is used as the basic language to be used in any further communication between the Trader and the Customs system. If the trader does not use this attribute then the Customs system will use the default language.

Transport mode at border		R	n..2	[Declaration] Border-Transport Means	(TransportMeans) modeAndType	transportMode Code

Code list 0041

C529: IF first digit of 'Specific circumstance indicator' = 'A'
THEN the attribute 'Transport mode at border' (box 25) '7' and '9' can not be used
IF first digit of 'Specific circumstance indicator' = 'C'
THEN the attribute 'Transport mode at border' (box 25) '1', '2', '4', '7', '8' and '9' can not be used
IF first digit of 'Specific circumstance indicator' = 'D'
THEN the attribute 'Transport mode at border' (box 25) '1', '3', '4', '7', '8' and '9' can not be used
ELSE the attribute 'Transport mode at border' (box 25) = 'R' (any value)

R826: For air cargo transported with other modes of transported than air, the other mode of transport shall be declared (e.g. for air cargo transported on road, the mode of transport '3' (road) shall be declared).

Mode of transport corresponding to the active means of transport in which the goods are expected to enter the Customs territory of the Community. In the case of combined transport or where several means of transport are used, the active means of transport is the one which propels the whole combination. For example, in the case of a lorry on a sea-going vessel, the active means of transport is the ship. In road transports in the case of a tractor and trailer, the active means of transport is the tractor. Where air cargo is transported on modes of transport other than air, the other mode of transport shall be declared.

Identity of means of transport crossing border		D	an..27	[Declaration] Border-Transport Means	(TransportMeans) identity	transportMeans Identifier

C017: IF 'IMPORT OPERATION.Transport mode at border (box 25)' = '1' or '8'

THEN the attribute consists either of the International Maritime Organisation (IMO) ship identification number (format n7 - leading '0' allowed)
IF 'Transport mode at border' = '2'
THEN the attribute consists of the wagon number and has no format restrictions
IF 'Transport mode at border' = '3'
THEN the attribute consists of the registration plate number and has no format restrictions
ELSE no format restrictions

Nationality of means of transport crossing border		D	a2	[Declaration] Border-Transport Means	(TransportMeans) registrationNationality	countryCode

Code list 0058

C024: IF 'IMPORT OPERATION.Transport mode at border (box 25)' is '3' and if 'IMPORT OPERATION.Identity Crossing Border (box 21)' is present
THEN the attribute = 'R'
ELSE the attribute can not be used

Capital letters must be used.

Total number of items		R	n..5	Declaration	goodsItem	quantity

TR0811: The data item 'Total number of items' has to be equal to the total occurrences of the data group 'GOODS ITEM'.

Total number of packages		D	n..7	[Declaration] Declaration-Packaging	(Packaging) packages	quantity

C582: IF the data group 'PACKAGES' is used
THEN this attribute is = 'R'
ELSE this attribute can not be used

R105: The total number of packages is equal to the sum of all 'Number of packages' + all 'Number of pieces' + a value of '1' for each declared 'bulk'.

Total gross mass	O	n..11,3	Declaration	totalGrossMass	measure
Declaration place	R	an..35	Declaration	(Document) issueLocation	lineType
Specific Circumstance Indicator	O	a1	[GoodsShipment.Consignment] AdditionalInformation	circumstance	circumstanceCode

Level 1	Level 2	RDO	Format	Path	(General type) tag	type
Code list 0402 This element needs to be provided only where the benefit of a special circumstance is requested by the person lodging the summary declaration. This following check shall be performed if the AEO-Database in which the AEO certificate numbers are registered is available when performing the check: • The 'Specific circumstance indicator' with value 'E' (AEO) can be used only if the 'Person Lodging the ENS', all 'Consignees' and 'Representative' declared in the ENS have a valid AEO certificate of type 'AEOF' or 'AEOS'. Capital letters must be used.						
Transport charges / method of payment		O	a1	[GoodsShipment.Consignment] FreightPayment	method	freightPaymentMethod-Code
Code list 0327 This information is to be provided only where available. Capital letters must be used.						
Commercial reference number		D	an..70	[GoodsShipment.Consignment] UCR	traderReference	textType

C567: IF the attribute 'Specific Circumstance Indicator = 'A'
THEN the attribute 'Commercial Reference Number (box 7)', 'Commercial Reference Number (ex box 7)' and the datagroup 'PRODUCED DOCUMENTS/CERTIFICATES' = 'O'
ELSE
IF the attribute 'Commercial Reference Number (box 7)' and 'Commercial Reference Number (ex box 7)' is not used,
THEN at least one attribute 'PRODUCED DOCUMENTS/CERTIFICATES.Document type' pointing to a transport document must be present
ELSE the data group 'PRODUCED DOCUMENTS/CERTIFICATES' = 'O'

Unique number assigned to goods, for entry, import, exit and export. World Customs Organization / ISO15459 codes or equivalent shall be used.

Conveyance reference number		D	an..35	[Declaration] BorderTransportMeans	journey	lineType

TR0518: IF 'Transport mode at border' = '4'
THEN the attribute has format an..8 AND the string must contain the carrier code (an..3), the flight number (n..4) and an optional suffix (a1) without any separator between the two or three trimmed elements.

TR0519: IF 'Transport mode at border' = '1' AND 'Conveyance reference number' is used AND the first four digits consist of XFER in uppercase
THEN the first four digits shall consist of 'XFER' in uppercase, followed by the lorry registration plate number
ELSE 'XFER' cannot be used.

R843: The 'Conveyance Reference Number' is the identification of the journey of the means of transport (e.g. flight number, train number, voyage number, trip number).

Information to be produced where appropriate. For rail mode of transport, the train number shall be provided. This data element shall be provided in case of multimodal transport, where applicable.

Sea transport (mode of transport at border 1): In cases of combined transport where a truck/articulated vehicle is loaded onboard a seagoing vessel the truck/articulated vehicle registration number is to entered as the conveyance reference number. Registration number is to be preceded by code XFER (with capital letters and without a space). For example: XFERABC-123.

Place of loading		D	an..35	[GoodsShipment.Consignment] LoadingLocation	(Location) name	text

C574: IF the attribute 'Specific circumstance indicator' = 'A'
THEN
the attribute 'IMPORT OPERATION.Loading place' is = 'O'
the attribute 'GOODS ITEM.Loading place' can not be used
ELSE
IF the attribute 'IMPORT OPERATION.Loading place' is used
THEN the attribute 'GOODS ITEM.Loading place' can not be used
ELSE the attribute 'GOODS ITEM.Loading place' = 'R'

R670: The first two digits of the 'Place of loading' and 'Place of unloading' shall consist of the country code followed by the name of a seaport, airport, freight terminal, rail station or other place.

Name of a seaport, airport, freight terminal, rail station or other place at which goods are loaded onto the means of transport being used for their carriage.
Express consignments summary declarations — postal consignments: this element does not need to be provided where it can be deduced automatically and unambiguously from other data elements provided by the trader. Road and rail modes of transport: this can be the place where goods were taken over according to the transport contract or the TIR customs office of departure.

The first two digits must be capital letters.

Place of unloading		O	an..35	[GoodsShipment.Consignment] UnloadingLocation	(Location) name	text

R670: The first two digits of the 'Place of loading' and 'Place of unloading' shall consist of the country code followed by the name of a seaport, airport, freight terminal, rail station or other place.

Name of the seaport, airport, freight terminal, rail station or other place at which goods are unloaded from the means of transport being used for their carriage.
Road and rail modes of transport: where the code is not available, the name of the place shall be provided, with the maximum level of precision available. If however the road transport in question arrives via a temporary frontier crossing point, the controlling customs office is entered as the first entry customs office (code list 0129) and the temporary frontier crossing point is entered at the place of unloading.

The first two digits must be capital letters.

Customs reference number				D	an17	Declaration	customsReference	identifier
In case of amendment, enter reference number provided by the Finnish Customs.								
Dialog language indicator at destination				D	a2	Declaration	language	languageCode
Code list 0036								
The attribute is used as the basic language to be used in any further communication between the Trader and the Customs system. If the trader does not use this attribute then the Customs system will use the default language.								
Transport mode at border				R	n..2	[Declaration] BorderTransportMeans	(TransportMeans) modeAndType	transportMode Code
Code list 0041								
For air cargo transported with other modes of transported than air, the other mode of transport shall be declared (e.g. for air cargo transported on road, the mode of transport '3' (road) shall be declared).								
Mode of transport corresponding to the active means of transport in which the goods are expected to enter the Customs territory of the Community. In the case of combined transport or where several means of transport are used, the active means of transport is the one which propels the whole combination. For example, in the case of a lorry on a sea-going vessel, the active means of transport is the ship. In road transports in the case of a tractor and trailer, the active means of transport is the tractor. Where air cargo is transported on modes of transport other than air, the other mode of transport shall be declared.								
Total gross mass				R	n..17,3	Declaration	totalGrossMass	measure
Total number of manifest items				R	n..5	Declaration	goodsItem	quantity
The total number of manifest items must be the sum of all manifest items declared.

Entry: The country of original departure must be entered in any case. If the special circumstance indicator is not equal to 'A', then at least the country of final destination must be entered additionally.

Country of routing code	R	a2	[Response.GoodsShipment] Consignment	routingCountry	countryCode

Code list 0058

Identification in a chronological order of the countries through which goods are routed between the country of original departure and final destination. This comprises the countries of original departure and of final destination of the goods.

This information is to be provided to the extent known.

Capital letters must be used.

(REPRESENTATIVE) TRADER 1X	O

The data group 'TRADER Representative' can be used by the 'PERSON Lodging the entry summary declaration' to authorise a Representative to submit an Entry summary declaration on his behalf at the Office of first Entry concerned. If preventive/prohibitive measures are to be taken (IE351) or if controls at Entry are to be communicated to the trader prior to the arrival at Entry (IE351), the trader identified here, will be receiving the'Advanced intervention notification' – IE351.

(EXIT) CUSTOMS OFFICE 1X		**R**				
Reference number		R	an8	[Declaration] ExitCustomsOffice	(CustomsOffice. Location) code	identifier
The customs office of exit shall be the last customs office before the goods leave the customs territory of the Community, unless the goods are taken over under a single transport contract for transport of the goods out of the customs territory of the Community by the railway companies, the postal authorities, the airlines or the shipping companies, the goods are to leave the customs territory of the Community by rail, post, air or sea and the declarant or his representative requests that the formalities be carried out at the customs office competent for the place where the goods are taken over.						
Capital letters must be used.						

Level 1	Level 2	RDO	Format	Path	(General type) tag	type
GOODS ITEM 999X		**R**				
Item number		R	n..5	[GoodsShipment.Consignment] ConsignmentItem	sequence	numeric

R005: "Item no" (box 32) is always used even if "Items" (box 5) = "1", "Item no" (box 32) is also "1"

R007: Each "Item no" (box 32) is unique throughout the declaration. The items shall be numbered in a sequential fashion, starting from '1' for the first item and incrementing the numbering by '1' for each following item.

Goods description		O	an..280	[GoodsShipment.Consignment. ConsignmentItem] Commodity	cargoDescription	text

A plain language description that is precise enough for Customs services to be able to identify the goods. General terms (i.e. "consolidated", "general cargo" or "parts") cannot be accepted. A list of such general terms is published by the Commission at the web site: http://ec.europa.eu/taxation_customs/resources/documents/customs/policy_issues/customs_security/acceptable_goods_description_guidelines_en.pdf

Gross mass		D	n..11,3	[GoodsShipment.Consignment. ConsignmentItem] GoodsMeasure	grossMass	measure

C580: IF the attribute 'Specific circumstance indicator' = 'E'
THEN this attribute is = 'O'
ELSE this attribute is = 'R'

Weight (mass) of goods including packaging but excluding the carrier's equipment for the declaration.

Transport charges / method of payment		D	a1	[GoodsShipment.Consignment. ConsignmentItem] FreightPayment	method	freightPayment-MethodCode

Code list 0327

C576: IF the attribute EXPORT OPERATION / IMPORT OPERATION / TRANSIT OPERATION.Transport charges – Method of payment' is used
THEN this attribute can not be used
ELSE this attribute = 'O'

TR9120: If used, this data item has to be filled in at GOODS ITEM level only if there is more than one value, If there is one value, it has to be filled in at HEADER level

Capital letters must be used.

Commercial reference number		D	an..70	[GoodsShipment.Consignment. ConsignmentItem] UCR	traderReference	textType

C567: IF the attribute 'Specific Circumstance Indicator = 'A'
THEN the attribute 'Commercial Reference Number (box 7)', 'Commercial Reference Number (ex box 7)' and the datagroup 'PRODUCED DOCUMENTS/CERTIFICATES' = 'O'
ELSE
IF the attribute 'Commercial Reference Number (box 7)' and 'Commercial Reference Number (ex box 7)' is not used,
THEN at least one attribute 'PRODUCED DOCUMENTS/CERTIFICATES.Document type' pointing to a transport document must be present
ELSE the data group 'PRODUCED DOCUMENTS/CERTIFICATES' = 'O'

R876: If the same 'Commercial reference number' is declared for all goods items, the attribute 'Commercial reference number' (box 7) on Export Operation level is used. The attribute 'Commercial reference number' (ex box 7) on goods item level can not be used

Unique number assigned to goods, for entry, import, exit and export. World Customs Organization / ISO15459 codes or equivalent shall be used.

UN dangerous goods code		O	n4	[GoodsShipment.Consignment. ConsignmentItem] Commodity	UNDG	dangerous-GoodsCode

No code list available

The United Nations Dangerous Goods Identifier (UNDG) is the unique serial number (n4) assigned within the United Nations to substances and articles contained in a list of the dangerous goods most commonly carried. This element shall only be provided where it is relevant.

	PRODUCED DOCUMENTS / CERTIFICATES 99X	**D**

C567: IF the attribute 'Specific Circumstance Indicator = 'A'
THEN the attribute 'Commercial Reference Number (box 7)', 'Commercial Reference Number (ex box 7)' and the datagroup 'PRODUCED DOCUMENTS/CERTIFICATES' = 'O'
ELSE
IF the attribute 'Commercial Reference Number (box 7)' and 'Commercial Reference Number (ex box 7)' is not used,
THEN at least one attribute 'PRODUCED DOCUMENTS/CERTIFICATES.Document type' pointing to a transport document must be present
ELSE the data group 'PRODUCED DOCUMENTS/CERTIFICATES' = 'O'

The used transport documents are: N235, N271, N703, N704, N705, N710, N714, N720, N722, N730, N740, N741, N750, N760, N785, N787, N952, N955.

Reference of the transport document covers the transport of goods into or out of the customs territory.

If the declaration is used as an exit summary declaration for terminating temporary warehousing, the code '2YVP' specifying this must be specified for all goods items. The value of the code shall be the current date(DD.MM.YYYY).
