

Amendments to the Harmonized System Explanatory Notes – HS Committee 73rd Session

The following list contains the decisions taken by the Harmonized System Committee (73rd Session – March 2024) concerning amendments to the Harmonized System Explanatory Notes, applicable as of 1 June 2024. This publication will be updated regularly.

The Harmonized System Explanatory Notes are published by WCO in 5 volumes (2022 edition) and reflect the official interpretation of the Harmonized Commodity Description and Coding System. They also contain the text of the Subheading Explanatory Notes indicating the scope and content of certain of the Harmonized System Subheadings. The Explanatory Notes are available in English and French, the two official languages of the WCO, and can be ordered directly (see “Bookshop” on this Web site). They are also available on-line.

The amendments listed below are reproduced in the order of the current pages concerned and will be incorporated into the aforementioned WCO publications in due time by replacing the pages affected by the amendments made.

Advice

Parties seeking to import or export merchandise covered by a decision are advised to verify the implementation of the decision by the importing or exporting country, as the case may be.

AMENDMENTS TO THE EXPLANATORY NOTES

CHAPTER 24.

New heading 24.04.

Page IV-2404-1.

Delete and substitute:

“This heading covers :

Products containing tobacco, reconstituted tobacco, nicotine, or tobacco or nicotine substitutes, intended for inhalation into the mouth, other than directly into the nose, without combustion as defined in Note 3 to this Chapter.

These products include, *inter alia* :

Products containing tobacco or reconstituted tobacco, in different forms (e.g., strips or granules), intended for use in tobacco heating systems in which the heating is performed by electrical devices (electrically heated tobacco systems (EHTS)), by chemical reactions, by use of carbon heat source (carbon heated tobacco products (CHTP)), or by other means;

Nicotine containing solutions, including additives of concentrated nicotine, intended for use in electronic cigarettes or similar personal electric vaporising devices;

Products containing tobacco or nicotine substitutes, but not containing tobacco, reconstituted tobacco or nicotine, intended for use in electronic cigarettes or similar personal electric vaporising devices for recreational or smoking cessation purposes, including products that claim to contribute to general health and well-being (e.g., solutions containing essential oils, or vitamins).

Similar products intended for use in devices which produce an aerosol for inhaling otherwise than by heating, e.g., by means of a chemical process or by ultrasonic evaporation (e.g., nicotine inhalers); and

Disposable electronic cigarettes (disposable e-cigarettes) and similar disposable personal electric vaporising devices, that incorporate both the product intended for inhalation without combustion (e.g., e-liquid, gels) and the delivery mechanism in an integrated housing, that are designed for disposal after the incorporated product is exhausted or the battery runs out (not designed for refilling or recharging).

Other products containing nicotine, but not containing tobacco or reconstituted tobacco, intended for the intake of nicotine into the human body by chewing, dissolving, sniffing, transdermal absorption or by any other means except inhaling (e.g., tobacco-free oral nicotine pouches).

This group includes nicotine containing products for recreational use, as well as nicotine replacement therapy (NRT) products intended to assist tobacco use cessation, which are taken as part of a nicotine intake reduction programme in order to lessen the human body's dependence on this substance.

Amendments to the Harmonized System Explanatory Notes – HS Committee 73rd Session

The heading **excludes**:

- (a) Products containing tobacco, reconstituted tobacco or tobacco substitutes, intended to be inhaled following combustion (**headings 24.02 and 24.03**).
- (b) Products intended for the intake of nicotine into the human body other than by inhalation without combustion when containing tobacco or reconstituted tobacco (e.g., chewing tobacco (“chew” or, if packaged in single-use bags, “chew bags”), dipping tobacco (“dip”), snus, moist snuff, snuff (nasal tobacco), and oral nicotine pouches) (**heading 24.03**).
- (c) Tobacco products and nicotine-free products, where the product itself is combusted to produce an aerosol for inhalation, for use in water pipes and similar devices (**heading 24.03**).
- (d) Nicotine (the toxic alkaloid extracted from tobacco as well as this alkaloid obtained by synthesis) (**heading 29.39**).
- (e) Medicaments for therapeutic or prophylactic uses, including aerosol devices containing such medicaments (**heading 30.03 or 30.04**). However, products containing nicotine for smoking cessation, or devices containing such products, remain classified in this heading.”.

CHAPTER 25.

Heading 25.05.

Page V-2505-1. Heading text.

Delete and substitute:

“25.05 - Natural sands of all kinds, whether or not coloured, other than metal-bearing sands of chapter 26 (+).”.

Page V-2505-1. New Subheading Explanatory Note.

Insert the following new Subheading Explanatory Note:

“Subheading Explanatory Note.

Subheading 2505.10

For the purposes of subheading 2505.10, silica sands and quartz sands have a silicon dioxide content exceeding 90 % by weight.”.

CHAPTER 29.

Heading 29.22. Page VI-2922-5. Subheading Explanatory Note.

Insert the following new paragraph at the end of the Note:

“Methadone (INN) (subheading 2922.31) corresponds to the racemic mixture of methadone (CAS RN 76-99-3). The separate stereoisomers *d*- and *l*-methadone and their salts are **excluded** from subheading 2922.31 (**subheading 2922.39**).”

LIST OF NARCOTIC DRUGS AND PSYCHOTROPIC SUBSTANCES ARRANGED IN ALPHABETICAL ORDER BY TYPE OF DRUG.

Page VI-29-List I-1 to 8. I. Narcotic drugs subject to control under the Single Convention on Narcotic Drugs, 1961, as amended by the 1972 Protocol.

Delete and substitute:

CHAPTER 30.

Heading 30.02.

Page VI-3002-3. Part (D). Last paragraph.

Delete and substitute:

“The heading also includes products used for diagnostic purposes of microbial origin, **other than** those provided for in Note 4 (d) to this Chapter (**heading 30.06**) and those of **heading 38.22**. The heading **does not cover** enzymes (rennet, amylase, etc.) even if of microbial origin (streptokinase, streptodornase, etc.) (**heading 35.07**). The heading also excludes dead single-cell micro-organisms (other than vaccines) (**heading 21.02**).”.

Heading 30.06.

Page VI-3006-2. Item (5). Last paragraph.

Delete and substitute:

“Diagnostic reagents **not** designed to be administered to the patient (e.g., those for carrying out tests on blood, urine, etc., samples taken from a patient or for use as laboratory reagents) are **excluded**; these normally fall under **heading 38.22** (with the exception of reagents covered by Note 1 to Section VI (**headings 28.43 to 28.46 and 28.52**) or Note 1 to Chapter 28 or Note 1 to Chapter 29 (**Chapters 28 or 29**), or synthetic organic products of a kind used as luminophores of **heading 32.04**).”.

CHAPTER 38.

Heading 38.22.

Page VI-3822-3. Exclusion (c).

Amendments to the Harmonized System Explanatory Notes – HS Committee 73rd Session

Delete and substitute:

“(c) Synthetic organic products of a kind used as luminophores of heading 32.04, including preparations mentioned in Note 3 to Chapter 32;”.

CHAPTER 39.

Heading 39.13. (2) **Hardened proteins.** Page VII- 3913-1.

First paragraph.

Delete and substitute:

“Proteins are nitrogenous compounds of very high molecular weight of vegetable, animal or microbial origin. They are suitable for processing into plastics. The heading covers all proteins which have been processed to harden them. Only a few are of commercial importance.”

CHAPTER 44. GENERAL.

Page IX-44-4. Subheading Explanatory Note. First paragraph. Last sentence.

Delete and substitute:

“The pilot name is based on the most used local name employed in the principal producer country.”.

CHAPTER 44. ANNEX. First page.

Insert the following new text:

“spp.”: Latin abbreviation for “*species pluralis*”. The botanical genus of the designated species includes more than one species of which the more frequently used is mentioned. Here it means “all species” only in the case where no species is given as an example.

“p.p.”: Latin abbreviation for “*pro parte*”. In the same genus and on the same continent, some species may correspond to another listed species.

“subgen.”: Latin abbreviation for “subgenus”. In the same genus, several species with affinities are grouped botanically. In a subgenus, a species can correspond to all the species; to several, non-exhaustively listed species; or to a part of them, according to the same rules as mentioned above.”.

CHAPTER 44. ANNEX.

Pages IX-44-Annex-1 to IX-44-Annex-72. New Annex to the Explanatory Notes to Chapter 44.

Delete and substitute:

Amendments to the Harmonized System Explanatory Notes – HS Committee 73rd Session

Pilot-names	Scientific names	Local names (country ¹)
Zapatero	Casearia gossypiosperma Briq. Casearia praecox Griseb.	Limoncillo (BR) ; Zapatero (VE)
Zingana	Microberlinia bisulcata A. Chev. Microberlinia brazzavillensis A. Chev.	Allen Ele (CM) ; Amouk (CM) ; Zingana (GA)

CHAPTER 84.

Heading 84.11.

Insert the following new Subheading Explanatory Note:

“Subheadings 8411.81 and 8411.82

For the purposes of these subheadings, the power of gas turbine is measured at the output shaft.”.

CHAPTER 87.

Heading 87.09. Page XVII-8709-1.

1. First paragraph.

Delete and substitute :

“This heading covers a group of self-propelled vehicles of the types used only in factories, warehouses, dock areas or airports for the short distance transport of various loads (goods or containers) or, on railway station platforms, to haul small trailers.”.

2. Item (1).

Insert the following new second sentence :

“In this regard, they typically lack safety features (e.g., head and tail lamps, turn signal lamps), and the suspension (springs), of a kind required for road vehicles.”.

3. Item (3).

Delete and substitute :

“Their turning radius is approximately equal to the length of the vehicle itself, enabling them capable of manoeuvring tight corners often present in factories, warehouses, dock areas or airports.”.

Amendments to the Harmonized System Explanatory Notes – HS Committee 73rd Session

4. Item (4).

Insert the following new item (4) :

“Their design typically does not incorporate comfort features and interior finish and fittings typically found in vehicles of headings 87.02, 87.03 and 87.04.”.

CHAPTER 91.

Heading 91.05. Page XVIII-9105-2. New exclusion (a).

Insert the following new exclusion (a):

“(a) Atomic clocks, regarded as autonomous Primary Reference Sources, designed to generate accurate synchronisation signals (**heading 85.43**).”.

Renumber present exclusions (a) and (b) to (b) and (c), respectively.
