

AMENDMENTS TO THE COMPENDIUM OF CLASSIFICATION OPINIONS

Page XVIII/9.

Insert the following Classification Opinions :

- “9021.10**    2.    **Screw designed for use in the field of trauma surgery**, made of extra hard, colour-finished titanium alloy, of a length of approximately 12 mm. It has a wholly threaded shank with a constant outer diameter of 3 mm and a head. The shank has an asymmetrical thread. The head is also threaded, allowing it to lock into a compression plate in fixation systems, with a recessed socket drive. The product corresponds to the ISO/TC 150 standards for implant screws. It is presented in a sterilized packing. The product is marked with a number and thereby traceable throughout production, distribution and use.

**Application of GIRs 1 and 6.**
