

## **Statistics specification: Deliveries of goods within project export by the CN categories and countries**

### **Title of statistics**

Deliveries of goods within project export by the CN categories and countries

### **Collector**

Finnish Customs

### **Description**

Project export describes the export of equipment and devices for a certain construction project and other corresponding projects. A complete industrial plant or a corresponding building project is classified as a construction project.

### **Data content**

These statistics specify the value of the goods exported as a project delivery according to the CN categories and the value of project export according to countries. Assembly expenses and other such cost are not included, provided that these are separated from the price of the goods.

### **Data collecting method**

Statistics on deliveries within project export are collected through Intrastat declarations on the EU Member States and through customs declarations on countries not in the EU.

### **Applied classifications**

The compilation of statistics on commodities is based on the Combined Nomenclature CN of the EU. Export is recorded to the statistics by the countries of destination according to the FOB ("free on board") value and import by the countries of origin according to the CIF ("cost, insurance, and freight") value.

The country classification is based on the Commission Regulation (EC, 1833/2006) on the nomenclature of the countries and territories for the external trade of the Community and the internal trade between the Member States. The country codes comply with those of the ISO/DIS 3166 standard of the International Organization for Standardization.

### **Updating frequency**

Annually

### **Completion or publication date**

These statistics are not published any more (since 2007). Data on years succeeding 2004 are accessible at special request only at the Statistics of the Finnish Customs.

### **Time series**

Data exist since 1983. Electronic data are available on CD-Rom from 2000 to 2004. Data on years earlier exist in print in the archives.

### **Keywords**

import, project export, project deliveries, foreign trade
